

## LIGHT GUIDE SPACERS FOR BACKLIGHTING A REFLECTIVE DISPLAY

### ABSTRACT OF THE INVENTION

5           Light guide spacers for backlighting a reflective display. Embodiments of  
the present invention are directed to a reflective display assembly for an  
electronic device which is disposed above a backlight device. A light guide  
extends through the reflective display to conduct light from the backlight device,  
through the reflective display, and to a top surface of the reflective display. The  
10 display assembly may be used with a handheld computer system.
